**Bottom side:**

- |                               |
|-------------------------------|
| 27. USB Debug (J102)          |
| 28. micro SD Card slot (J101) |
| 29. RTC Battery Holder        |
| 30. USB0 OTG                  |

DVK initial Setup

- Carefully remove the 7" LCD and VAR-DT6CustomBoard board from the package.
- Connect the 7" LCD Touch and Display cables to the DVK connectors J7, J18 respectively as shown in the upper left picture.  
*Note: Display cable connector pins 1, 2 (colored in red) should be connected to J18 pins 1, 2 respectively.*  
*Touch cable – connect cable with metal contacts facing down.*
- Plug the USB type A to micro B cable between the USB debug connector (J102) and a PC USB port.
- Plug the wall adapter's pin into the VAR-DT6CustomBoard 5V power jack (J24) and to a 120VAC~240VAC power source.

## Setting the Host PC for Debug

1. Download any PC terminal program. Variscite suggests using [Putty](#)
2. Set PC terminal software parameters as follows:
  - Baud Rate: 115200
  - Data bits: 8
  - Stop bits: 1
  - Parity: None
  - Flow Control: None

## Using Default file System

1. Set Boot select switch (SW6) left to boot from DART-MX6 eMMC.
2. Switch ON (upwards) the PWR On switch (SW5).
3. Boot messages are printed within PC's terminal window.

## Bootting from micro SD Card

*The microSD card is supplied within the package. The image can be also downloaded from Variscite FTP site. Please contact Variscite's sales for details: [sales@variscite.com](mailto:sales@variscite.com)*

1. Verify Switch SW5 is OFF (downwards).
2. Set Boot select switch (SW6) right to boot from microSD Card.
3. Push microSD card into the microSD card slot (J101) of the VAR-DT6CustomBoard.
4. Switch ON (upwards) the PWR On switch (SW5).
5. Boot messages are printed within PC's terminal window.
