Variscite▸

<u>Variscite Quality Assurance Policy</u>

Variscite management recognizes that in order to maintain its leading position in the market it must provide a reliable and efficient service to its customers and ensure consistent high quality of all its products and services. To that end, an integrated quality management system was established based on the ISO9001, ISO13485 and ISO14001 standards.

The company's quality management system designed to ensure the highest satisfaction level of its customers, while reducing production costs, maintaining the company's profitability and ensuring the following objectives:

✓ Full compliance of the company's products to both technical and production specifications.

✓ Meeting the lead times and supply requirements as agreed with the customers.

✓ Focusing on protecting the environment while minimizing the environmental impact.

✓ Addressing the customer needs pre and post product delivery

✓ Increasing the awareness of all employees in the organization to the importance of quality.

✓ Increasing the awareness of all employees of the company to the importance of quality.

✓ Compliance with any relevant environmental law.

✓ Constant improvement in the environmental performance of the company.
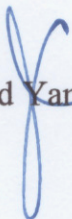

The Company's management is committed to take all required steps to ensure the existence of a continuing process of improvement in product quality and service it provides to its customers.

The company's management is committed to promoting environmental responsibility among employees and on an ongoing basis. Review goals for continuous improvement of the quality management system.

The Company's management is aware of the fact that the quality of its products and services depends on the proactive involvement of all employees and managers in order to achieve its goals. Management will allocate the necessary resources, determine measurable objectives, will ensure employee training and perform surveys and audits to ensure procedures implementation and constant improvements of its quality management system.

Management shall ensure compliance with all laws, regulations and standards relating to the company field of activity.
